Lueg Bridge on Brenner highway from 2025 only one lane in each direction passable

We would like to inform you that the **Lueg Bridge** near Gries am Brenner on the Brenner highway (A13) will only have **one lane of traffic in each direction from January 1, 2025**, due to renovation work. This will result in a reduction in transport capacity due to the single-lane traffic routing.

This also affects the direct **Lagermax lines from / to Italy. Delays and longer transit times must be expected.** If the restrictions for heavy goods vehicles, such as the ban on night-time driving, remain in place, there is a potential for extensive traffic jams.

Based on current information, the renovation or completely new construction of the Lueg Bridge near Gries am Brenner will take up to 3 years.

Further information can be found on the [ASFINAG](#) and [ÖAMTC](#) websites.
(only in german language)

If you have any questions, please contact the head of Lagermax Italy shipments.
